BOX DEPOSIT CONTINUES TO PRODUCE EXCELLENT DRILL RESULTS

For Immediate Release

Toronto: GRS / Frankfurt: GKF

January 22, 2008, Kirkland Lake, Ontario: GLR Resources Inc.(TSX:GRS) is pleased to provide assays for holes B07-295 and B07-296 of the 2007 fall-winter drilling campaign at the company's Box Mine property within the Goldfields project in Northern Saskatchewan.

A significant highlight is hole B07-296 which returned 2.54 g/t Au over 27m (88.6 ft). This hole including all assays averaged 1.83 g/t Au over 41 metres (134.5 ft) from 202.2m to 243.2m

As previously announced (see PR of Dec 3/07), there were sections of hole B07-292 where more sampling and assaying was needed. These assay results have now been received resulting in a substantial increase in the grade and width of the intersection.

The new results for B07-292 are 2.13 g/t Au over 49.8 metres (163.4 ft) compared with the previously announced 0.97 g/t Au over 19.4 metres (63.7 ft).

The following is the results of all the holes received to date. Assays are still pending for holes B07-297, B07-298, and some from the upper part of B07-293

Hole	From(m)	To(m)	Metres	True Width(m)	True Width(ft.)	Au (g/t)
B07-292	240.0	289.8	49.8	47.81	156.8	2.13
Including:	240.0	249.0	9.0	8.60	28.2	8.35
B07-293	246.0	283.0	37.0	32.56	106.8	0.51
Including:	246.0	259.0	13.0	11.44	37.5	0.69
B07-294	227.4	246.4	19.0	16.72	54.9	6.32
Including:	231.4	241.4	10.0	8.80	28.9	11.47
B07-295	232.0	251.0	19.0	16.72	54.9	0.53
Including:	245.0	251.0	6.0	5.30	17.4	1.08
B07-296	202.2	229.2	27.0	23.76	78.0	2.54
Including:	202.2	211.2	9.0	7.90	25.9	5.57

Assaying was by the total metallic method to eliminate any loss of the coarse gold fraction during sample processing in the assay laboratory. Sample processing and gold assaying was done by TSL Laboratories Inc. of Saskatoon (Saskatchewan).

Mr. John Cook, P.Eng. is the qualified person for the information contained in this press release and is a Qualified Person within the meaning of National Instrument 43-101.

Commenting on the drilling, Robert Kasner President &CEO stated “These are excellent and very encouraging results. The present pit is designed on a \$525 US gold price to a depth of 160 metres (525ft) I would expect that with the present price of gold, it may be possible to increase the pit size to recover the areas in the vicinity of these drill holes. We are in the process of retaining an engineering firm to update the pit model and resources of the Box mine area”.

Commenting on progress being made at the Athona deposit, Mr. Kasner further noted “ GLR has now retained the service of Bikerman Engineering and Technical to complete a pre- feasibility study on the reserves of the nearby Athona pit area. It is anticipated that this will be completed by early March 2008”.

About GLR Resources

GLR is a Canadian based junior mining and exploration company focusing on projects in North America and with existing projects in Ontario, Quebec and Saskatchewan. GLR’s most advanced project is its Goldfields Project, located near Uranium City in northern Saskatchewan. The Goldfields project consists of two open-pitiable Gold deposits - The Box and The Athona - containing a resource in excess of one million ounces Gold. GLR is focused on bringing the Goldfields project into production in 2009. GLR trades on the TSX under the symbol GRS.

Forward Looking Statements: This news release contains certain forward-looking statements. These forward-looking statements are subject to a variety of risks and uncertainties beyond GLR’s ability to control or predict which could cause actual events or results to differ materially from those anticipated in such forward-looking statements. Although GLR believes that the assumptions inherent in the forward-looking statements are reasonable, undue reliance should not be placed on these forward-looking statements.
